

Mobility Flash Update - October 2026

Dear colleague,

With this Mobility Flash Update, we would like to inform you about upcoming works on the access roads to and from Brussels Airport. Below please find an update of the major changes for **October 2026***.

1. Prolongation of the Airport Tram works along Kompaslaan

The utility works on Kompaslaan, between b.house and Building 8, have been extended until the end of October. From mid-October, work will commence on the section between Building 8 and Building 9 (near the Strabet roundabout), meaning that **only one lane** will be available there. To manage traffic flows, **traffic lights** will be installed at the junction of Kompaslaan and the Strabet roundabout. These will be in operation **from 21 October until the end of October, daily from 6.30 am to 4 pm.**

This will have an impact on traffic:

- **Pedestrians and cyclists:** passage remains possible in both directions.
- **Motorised traffic:** traffic will be regulated alternately by **traffic lights**; please allow for extra waiting time at the traffic lights.

After 4.00 pm, the road will be open to **traffic in both directions** and the traffic lights will not be in operation.

2. Roadworks on the Ring Road – Phase change from 19 October

The works are primarily focused on the completion of the A201 road infrastructure, preparing for the opening of the **new traffic route towards Evere**.

The 19 October phase change will take place in several stages

- From 1 to 6 pm – traffic towards Evere will be channelled into a single lane.
- From 8 pm – traffic from the outer ring road towards Evere will be diverted via the Strabet roundabout.
- From 9 pm – traffic from Evere towards Brussels Airport will be diverted via the Inner Ring Road and must turn round on Henneaulaan. A diversion will be in place.

The works are scheduled so that **everything will be completed before the morning peak on 20 October.**

Phase change: new traffic light configuration on the A201

From 20 October, traffic in both directions will use the **new bridges on the A201**. This means that traffic travelling from Zaventem to Evere will also use the new infrastructure.

With the phase change, the traffic light arrangements on the A201 will also change. Three temporary traffic lights will now regulate traffic flows between the A201 and the R0 access and exit slip roads. Traffic coming from Evere towards the R0 Inner Ring will no longer need to pass through traffic lights.
